

Small wind slab near Fairy Lake

Fairy Lake

Bridger Range

9/29/2019

Code

SS-AS-R1-D1-S

Elevation

9000

Latitude

45.90430

Longitude

-110.95800

Notes

From e-mail: "The only places one could ski were wind pockets blown into the limestone fin features that in places were well over a foot. These spots were also where the snow was weirdest/posed any sort of avalanche hazard as you pretty much had to find a [wind slab](#) in order to ski anything! One group reported triggering a [slab](#) in one of these spots, but vis was too poor to see."
