

Natural cornice triggered in Maid of the Mist basin

Maid of the Mist
Northern Gallatin
3/29/2020
Code
SS-NC-R1-D2-I
Elevation
10000
Aspect
E
Latitude
45.41110
Longitude
-110.98800
Notes

From obs. (3/29/20): "Significant wind started building mid morning, forming even bigger cornices and [wind loading](#) many slopes. Noticed this [slide](#) on an East/Northeast [aspect](#) at the back of the bowl above Maid of the Mist creek, possibly triggered by [cornice](#) fall but unknown. Happened between 9:45am and 11:30am today, as at 9:30am it was not there, and when we returned to the spot around 11:30am the [slide](#) was visible." Photo: CP
