## Blackmore, south end of the east face, 9600'

Date Fri, 02/19/2021 - 09:30 Activity Skiing

I toured into Blackmore with a client this morning and observed an old snow avalanche at 9600' on the east face of Mt Blackmore. I was there the day before and didn't see any evidence of avalanche activity; strong overnight winds with ample snow available for transport appeared to be enough to tip the scales.

Region Northern Gallatin Location (from list) Mt Blackmore Observer Name Ty Guarino
