

Natural in Argentina Bowl

Argentina Bowl

Bridger Range

2/17/2022

Code

SS-N-R1-D2-I

Elevation

8700

Aspect

NE

Latitude

45.78690

Longitude

-110.93500

Notes

From email: "Saw several recent avalanches on the east side of Saddle Peak on my drive up to Bridger this morning. All looked like naturals, I'd guess most were size R1D1 and one R1D2."

GNFAC forecasters saw the same slides which looked to involve the new snow. Most were R1-D1 dry loose and [cornice](#) falls, and there was one R1-D2 in Argentina Bowl that was likely a storm [slab](#).

Number of slides

1

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Natural trigger

R size

1

D size

2

Bed Surface

I - Interface between new and old snow

Problem Type

New Snow

Vertical Fall

900ft

Slab Thickness units

centimeters

Single / Multiple / Red Flag

Single Avalanche

Advisory Year
