Whumphing and natural wet slide near Electric Peak

Electric Peak Southern Gallatin 3/26/2022 Code WL-N-R2-D2-G Latitude 45.00800 Longitude -110.83700 Notes

From obs 3/26/22: "Freezing temps overnight created breakable crust in the morning which quickly deteriorated as the day warmed. (Temps rose surprisingly faster than we anticipated. Experience large whumphs while ascending the NW shoulder of Electric Pk. at 9600 ft. Without hesitation we turned back and skied out the skin track. The snow became very rotten and we penetrated to boot-tops often while exiting."
