storm slabs at Bridger

Bridger Bowl
Bridger Range
4/13/2023
Code
SS-N-R1-D1
Elevation
8300
Aspect Range
E, NE, SE, SW, NW
Latitude
45.81560
Longitude
-110.92300

"Small storm <u>slab</u> off the steep drift on skier's R/skinner's L side of upper Thunder Road. Also felt some cracking and collapsing when I (briefly) stepped off the skin <u>track</u> to get to the top of Pierre's Knob."

"skinned up to the ridge and observed 5-9 inches of new and accumulating snow forming into wind drifts that were highly reactive. Multiple remote triggers occurred while traveling N on the ridge, propagating both on W and E faces of the ridge. Both Hidden and Northwest Passage slid with little effort down to an icy <u>bed surface</u>. Debris at bottom of hidden was substantial but great skiing."
