

Wet snow avalanches at Bridger

Date

Wed, 04/26/2023 - 02:15

Activity

Skiing

Yesterday 4/25, Walked to the top of Pierre's Knob. The snow was unconsolidated mush, very sticky skiing. While hanging out at the top shack I heard 3 large avalanches running in the south bowl, white out conditions so was unable to see how big the slides were they sounded like they ran a long ways.

Region

Bridger Range

Location (from list)

Bridger Bowl

Observer Name

Bryon Aas
