

Sheep Creek

Date

Mon, 11/27/2023 - 13:00

Activity

Skiing

Clear, Light N Wind, No cracking, collapsing, or recent avalanche activity. Snow depth ranged from 6-12" at 8500' to ~2-3' at 9300' and above. Through that whole valley, there is a supportable crust that ranges from 2cm-5cm and is more or less supportable depending on sun exposure. In the trees and shaded areas, this crust doesn't exist. Any shallow and shady area is unsurprisingly a pile of sugary snow. Where the snow is deeper and has been getting sun there is a more layered snowpack.

Region

Cooke City

Location (from list)

Sheep Creek
