

Woody ridge Obs.

Date

Fri, 12/15/2023 - 13:50

Activity

Skiing

9700', W, 23 degrees, Hs 100cm

Ectp16 @60cm on .5-1.5mm facets

The average snow depth was around 70cm with slab depth being 25-40 cm. Widespread surface hoar on the surface, all elevations and aspects.

I didn't feel any collapsing or see any cracking.

Region

Cooke City

Location (from list)

Woody Ridge

Observer Name

Ryan Griffiths
