

Instability in tele meadows area

Date

Sun, 01/28/2024 - 13:15

Activity

Skiing

Observed collapsing and shooting cracks near top of meadows around 7700 feet. Dug a pit in this area as well. Snow was 80 cm deep. Our test yielded unstable results - ECTP 11 35cm down on the obvious surgery facets. Slab seemed to be stiffening with warmer temps.

Region

Southern Madison

Location (from list)

Telemark Meadows

Observer Name

Chris Pruden
