Continuous Collapsing at Bacon Rind

Date Sun, 02/11/2024 - 10:45 Activity Skiing

We got the same feedback that Dave and Doug did on 2/5/24 - collapsing every time we stepped out of the skin track or turned with any force, as well as a few sizable collapses triggered from inside the skin track. Very touchy, skied very well. Stayed well away from avy terrain.

Region Northern Madison Location (from list) Bacon Rind Observer Name Mike Zenker
