

Pit Results from History Rock

Date

Mon, 01/06/2025 - 14:35

Activity

Skiing

Did a few laps on third meadow, and dug a pit. The pit resulted in two failures without propagation pleasant skiing all the way down (new snow on top of old powder turns).

Pit Results

45.48054, -111.01267

~120cm depth

Facets forming on top in sun

ECTN5 failed 80cm above ground

ECTN25 failed 30cm above ground

I went full barbarian on the column after 30 taps, and couldn't get it to slide on the facets in the ground.

Profile: Sugary facets 0-20cm; 1F 20-30cm; 1F crust @30cm, 4F 30-70. Fist 70-125cm (0cm is the ground).
