

History Rock Test Scores

Date

Mon, 01/13/2025 - 13:10

Activity

Skiing

Skied the third meadow and dug a pit this morning. Calm winds with no evidence of previous winds around 8500'. S1 in the morning which ceased as skies began to clear midday. No signs of instability were observed.

Our pit provided several ECT results on multiple interfaces, which we were curious about after this previous storm cycle but were surprised by the lack of propagation/quality in our results.

Region

Northern Gallatin

Location (from list)

History Rock

Observer Name

E. Webb
