

Windy in Hyalite

Date

Thu, 01/16/2025 - 09:50

Activity

Skiing

Lots of snow moving around in Hyalite this morning! Strong winds were moving snow at/above treeline, Lee aspects getting loaded. Observed a fresh slide on the north side of Mt Blackmore, crown was already filling in, but looked to be a foot or two deep in steep rocky terrain to the skiers left of the north couloir. Some big snow bombs coming out of the trees on the trail right onto your head.

Region

Northern Gallatin

Location (from list)

Mt Blackmore

Observer Name

Spencer Jonas
